

SECTION 2.4: NON MEDICINES UTILISATION SUB-COMMITTEE

ROLE:

Ensure the safe, effective and efficient utilisation of non-medicines e.g. medical devices, wound, stoma, urology and nutritional products within NHSGGC.

This includes:

- Developing, updating and ratifying NHSGGC Non-Medicines Formularies and relevant guidelines (those containing prescribed non-medicines)
- Promoting implementation of NHSGGC Non-Medicines Formularies to maximise safe, effective and efficient use of products
- Utilising data to support implementation and review of NHSGGC Non-Medicines Formularies

TERMS OF REFERENCE:

The core function of the Non-Medicines Utilisation Sub-Committee is to:-

Review the recommendations prepared by relevant groups for the Non-Medicines Formularies. The identified groups, sub groups and short life working groups will assess and propose a formulary position, liaising with relevant stakeholders, considering the products with respect to the

- Clinical safety, effectiveness and evidence base
- Service and implementation impact
- Economic impact/cost effectiveness against comparators

Support local groups or short life working groups to:

- Evaluate utilisation data to review trends
- Develop innovative strategies to promote quality and cost-effective use of Non-Medicines Formularies
- Develop and maintain a register of specialist/clinical groups for consultation to inform local decision making and implementation
- Monitor adherence to the Non-Medicines Formularies
- Commission protocols and treatment guidelines where appropriate
- Maintain, develop and promote NHSGGC Non-Medicines Formularies including co-ordination of a programme of regular review
- Develop criteria for inclusion in the various non-medical formularies.
- Provide 6 monthly progress reports to ADTC, including potential clinical governance issues resulting from the introduction of new products/formulary changes
- Liaise with NHS GGC Dressings and Sundries Committee and procurement to ensure availability of products or equivalent choice across both primary and acute sector
- Monitor and support implementation of non-medical prescribing across NHSGGC
