SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Ascorbic Acid	LICENSED tablets available	Use effervescent tablets if possible. Where lower doses are necessary, the effervescent tablets can be halved / quartered and dispersed in water, or the standard tablets can be crushed and mixed with water for administration.	Unlicensed oral suspension/solutions available.	
Atorvastatin	LICENSED chewable 10mg & 20mg tablets available.	Atorvastatin can be crushed and mixed with water but not very soluble; residue left so incomplete dosing and may block tubes. Give immediately as the drug is light sensitive. See NEWT for further guidance	Unlicensed oral suspension available	Cost varies depending on strength and volume.
Atropine Sulphate Eye Drops 1% P/F	LICENSED unit dose eye-drops available (Minims® Atropine Sulphate 1%)		Unlikely to need as licensed preparation available	NHSGGC Formulary advice: restricted to specialist use only.
Aveeno				Aveeno Body Wash, Intense Relief Hand Cream, Moisturising Creamy Oil, Daily Moisturising Lotion, Daily Moisturising Body Cleansing Oil and Skin Relief Moisturising Lotion included in Part 7U of the Scottish Drug Tariff
Azathioprine - DO NOT CRUSH		Caution - cytotoxic. Use unlicensed oral suspension. Wear gloves when handling suspension in case of contact with medication. See NEWT for further guidance.		Oral Suspension 50mg/5ml x 150ml included in Part 7S of Scottish Drug Tariff. NHSGGC Formulary advice: Restricted to specialist initiation.

B

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Bendroflumethiazide	No LICENSED oral solution/suspension available	Tablets will disperse readily in water in one to five minutes. See NEWT for further guidance	Unlicensed Special oral suspension/solutions available.	Oral suspension 2.5mg/5ml x 150ml included in Part 7S of Scottish Drug Tariff
Benzalkonium Chloride Solution 1%				
Bepanthen®				Bepanthen Nappy Care Ointment 5% included in Part 7U of Scottish Drug Tariff
Bio Melatonin® (see Melatonin entry)	No longer available in the UK as a ULM, licensed Pharma Nord Melatonin 3mg tablets available and are an almost identical preparation. Refer to melatonin Shared Care Agreements (SCA) for latest guidance.			
Biotene® Dry Mouth Antibacterial Toothpaste Original				Included in Part 7U of Scottish Drug Tariff
Bioxtra®				
Bisoprolol	Consider switching to alternative beta-blocker if clinically appropriate : atenolol (available as LICENSED SF liquid) (NB. DO NOT switch if for Heart Failure - seek advice)	Tablets can be crushed finely and mixed with water for administration. The lower strength tablets will disperse in one to five minutes without crushing. The higher strength tablets should be crushed before mixing with water. Different brands may disperse at different rates. See NEWT for further guidance.	Unlicensed Special oral suspension/solutions available.	Oral suspension 2.5mg/5ml (150ml) included in Part 7S of Scottish Drug Tariff. Please refer to www.ggcmedicines.org.uk for Prescribing notes/restrictions in NHSGGC.
Blephagel®				Blephagel® eye gel 0.36% preservative free included in Part 7U of Scottish Drug Tariff
Blephasol®				Blephasol® preservative free lotion included in Part 7U of Scottish Drug Tariff

C

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Calciferol	See Colecalciferol below			
Calcium Carbonate	LICENSED preparations available (including Calcium Carbonate effervescent tablets and calcichew chewable tablets).		Unlikely to need; licensed products available	250mg dispersible tablets & various strengths of oral suspension available as unlicensed specials.

C

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Captopril	LICENSED Captopril Oral Solution SF 5mg/5ml and 25mg/5ml	Captopril tablets will disperse in water in 1-5 minutes. Captopril tablets have been given sublingually. To use this route the dose should be halved and given twice as frequently (i.e. 25mg twice daily becomes 12.5mg four times daily. Monitor blood pressure. See NEWT for further guidance		LICENSED Captopril Oral Solution SF 5mg/5ml and 25mg/5ml
Carbamazepine	LICENSED preparations available (oral liquid, and suppositories)			In the treatment of epilepsy, recommended to maintain on a specific manufacturer's product. Care is needed when switching between different preparations.
Carbimazole		Crush tablets and disperse in water.	Unlicensed oral suspension available	
Carvedilol	Consider switching to alternative beta-blocker if clinically appropriate : atenolol (available as LICENSED liquid) (N.B. Do NOT switch if for Heart Failure)	Tablets can be dispersed to form a suspension in water. They disperse in 1-5 minutes. Use immediately. See NEWT for further guidance		Please refer to www.ggcprescribing.org.uk for restrictions on prescribing
Cefuroxime Eye Drops (preservative-free option also available)				Please refer to www.ggcprescribing.org.uk for restrictions on prescribing. Principal side effect of the cephalosporins is hypersensitivity. Cross-reactivity between penicillins and first and early second generation cephalosporins has been reported to occur in up to 10%, and for third-generation cephalosporins in 2-3%, of penicillin-allergic patients (please refer to BNF for further information).
Cetaphil®				Cetaphil Body Cream and Gentle Skin Cleanser included in Part 7U of Scottish Drug Tariff

C

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Chloral Hydrate	NB: drug considered less suitable for prescribing. LICENSED Chloral Hydrate 143.3mg/5ml oral solution available.		Liquid Specials available	500mg/5ml mixture x 200ml included in Part 7S of Scottish Drug Tariff.
Chlorothiazide		Tablets will disperse in water in less than a minute.	Unlicensed tablets and liquid preparations available	Costs vary with strength and volume
Chlorpromazine	LICENSED oral solutions available (25mg/5ml, 100mg/5ml)		Unlikely to need: licensed products available	
Ciclosporin 0.2% Eye Ointment (Preservative containing and Preservative Free options)				Please refer to www.ggcprescribing.org.uk for notes and restrictions on prescribing in NHS GGC.
Ciclosporin Eye Drops (Preservative Containing and Preservative Free options)	LICENSED preservative containing products are available (indications vary) Ikervis ® 1mg/mL 0.3ml emulsion in single dose units (30 unit doses £72.00)- licensed in adults for treatment of severe keratitis in adult patients with dry eye disease, which has not improved despite treatment with tear substitutes Verkazia ® 1ml/mL 0.3ml emulsion in single dose units (120 unit doses £288.00)- licensed for the treatment of severe vernal keratoconjunctivitis (VKC) in children from 4 years of age and adolescents.		Unlicensed eyes drops available.	Please refer to www.ggcprescribing.org.uk for notes and restrictions on prescribing in NHSGGC.
Ciprofloxacin 0.3% ear-drops	Use licensed (Cetraxal®) preparation, 2mg/ml unit dose vials		Ciprofloxacin or ofloxacin ear drops (both unlicensed) are available from 'special-order' manufacturers or specialist importing companies.	Unlicensed product unlikely to be required
Ciprofloxacin 0.2% eye-drops (preservative-free) multidose	Licensed ciprofloxacin 0.3% eye drops (Ciloxan®). Licensed levofloxacin preservative-free unit dose eye drops (Ofraqix®) are preservative free alternatives.		Ciprofloxacin 0.2%w/v PF multidose eye drops (unlicensed) available.	Ciprofloxacin 0.2%w/v PF multidose eye drops - Not suitable for primary care. 24 hour in-use shelf-life as cannot be refrigerated.
Clindamycin		Open capsule and disperse contents in water or mix with grape juice or maple syrup (to mask unpleasant taste). Give immediately. See NEWT for further guidance	Unlicensed Special oral suspension available.	Costs vary with volume and strength
Clobazam	LICENSED oral suspensions available in various strengths: 1mg/ml(Perizam®), 2mg/ml(Perizam®), 5mg/5ml(Tapclob®), 10mg/5ml(Tapclob®)	Tablets can be dispersed or crushed and mixed with water, but unpleasant taste. See NEWT for further guidance		Note - restricted to specialist initiation in NHSGGC Formulary. The MHRA has issued guidance recommending that (where possible) patients on clobazam (when used for seizures) are maintained on a specific manufacturer's product, due to variability in product characteristics which may lead to a loss of seizure control when switching between brands/manufacturers. All product switches should be carried out with care and close monitoring.

C

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Clomipramine HCl	Consider switching to alternative if appropriate : amitriptyline, lofepramine, trazodone (available as LICENSED liquids)	Open capsules and disperse contents in water. Do not crush modified-release tablets, they are not suitable for enteral tube administration. See NEWT for further guidance.	Unlicensed 50mg/5ml oral suspension available.	Note - restricted to specialist initiation in GGC Formulary.
Clonazepam	Clonazepam 500mcg/5ml and 2mg/5ml oral solution SF are available as LICENSED products. For patients over 12 years of age - licensed liquid preparation can be used. For patients under 12 years of age , contact PSS	Use licensed liquid. Tablets can be dispersed in at least 30ml of water (large volume required to prevent binding to enteral tube) See NEWT for further options/guidance on use in enteral tubes, as varies depending on type of tube	2.5mg/ml oral drops available from Aclardian Specials . Alcohol free ULM available from PSS	Note - restricted to specialist initiation in NHSGGC Formulary. The MHRA has issued guidance recommending that (where possible) patients on clonazepam (when used for seizures) are maintained on a specific manufacturer's product due to variability in product characteristics which may lead to loss of seizure control when switching between brands/manufacturers. All product switches should be carried out with care and close monitoring.
Clopidogrel		Tablets can be crushed and dispersed in water. Most brands disperse in one to five minutes without crushing.		75mg/5ml oral suspension included in Part 7S of Scottish Drug Tariff
Co-careldopa	Consider switching to LICENSED Co-beneldopa capsules/dispersible tablets.	Standard Sinemet tablets will disperse in water. Lower strengths disperse within one minute. The 25/250 strength will disperse in one to five minutes. Give immediately as drug will oxidise. Do not crush modified-release (CR) tablets. See NEWT for further guidance including dose conversion table.	Liquid special suspensions available of varying strengths to suit dose required.	6.25mg/25mg/5ml and 25mg/100mg/5ml oral suspension included in Part 7S of Scottish Drug Tariff
Cod Liver Oil				Cod Liver Oil capsules (400mg, 550mg and 1000mg) included in Part 7U of Scottish Drug Tariff
Co-dydramol	Consider switching if appropriate to co-codamol (N.B. contains codeine not dihydrocodeine) effervescent tablets or paracetamol (available as soluble tablets, suspension and suppositories) or separate components (licensed paracetamol and licensed codeine oral liquids) . N.B. Dihydrocodeine liquid not available.		Liquid special available 10mg/500mg/5ml strength	SF Suspension 150ml
Colecalciferol Tablets/Capsules	LICENSED tablets and capsules available in various strengths (see Appendix 1 for table of licensed colecalciferol preparations and costs). Some tablet formulations (e.g.Desunin) are licensed to be crushed and given with food. Consult SPC's		Use of unlicensed specials should not be required.	Fultium D3 3,200iu excluded from NHSGGC Formulary. Invita D3 oral ampoules restricted to use only when other oral Vitamin D preparations are not suitable. See NHSGGC – Vitamin D Supplementation: http://www.ggcprescribing.org.uk/blog/medicines-update-primary-care-february-2017/

C

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Colecalciferol Oral Solution	Liquid preparations available in various strengths (see Appendix 1 for table of licensed colecalciferol preparations and costs). Fultium-D3 drops (3 drops = 200iu) and Thorens drops (2 drops = 400iu) may be mixed with a small amount of cold or lukewarm food immediately prior to use. In infants, children and adolescents, Fultium-D3 drops can be mixed with a small amount of children's foods, yoghurt, milk, cheese or other dairy products.		Unlicensed special liquids available. Commercial oral drop preparations available (not licensed as a medicine).	Invita D3 oral ampoules restricted to use only when other oral Vitamin D preparations are not suitable. See NHSGGC – Vitamin D Supplementation: http://www.ggcprescribing.org.uk/blog/medicines-update-primary-care-february-2017/ Invita D3 oral ampoules restricted to use only when other oral Vitamin D preparations are not suitable.
Co-Proxamol			Unlicensed tablets available	
Cyanocobalamin	LICENSED 50 microgram, 1mg tablets, and 1000mcg/ml solution for injection available (note-Cytacon® tablets/liquid, and Cytamen® injection not available on NHS prescription - included in blacklist)			Cyanocobalamin is considered in BNF as being less suitable for prescribing.
Cyclizine HCl	Consider switching if appropriate to alternative anti-emetic: metoclopramide or domperidone (available as LICENSED liquids)	Crush tablets and disperse in water. Protect from light. Note tablets have a bitter taste. See NEWT for further guidance.		Cyclizine 50mg/5ml suspension is included in Part 7S of the Scottish Drug Tariff

D

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Dabigatran	Consider change to other DOAC if clinically appropriate. Rivaroxaban (Xarelto®) may be crushed and mixed with water or apple puree immediately prior to use and administered orally. The crushed tablet may also be given in a small amount of water via a gastric tube. Apixaban (Eliquis®) can be crushed and suspended in water, 5% dextrose in water (D5W), apple juice or apple puree for immediate oral administration. Eliquis® tablets may be crushed and suspended in 60ml of water or D5W for immediate administration through a NG tube. Crushed Eliquis® tablets are stable in water, D5W, apple juice or apple puree for up to 4 hours.	Dabigatran (Pradaxa) capsules should not be opened. Opening the capsules may greatly affect the oral bioavailability of the drug, with a risk of increased side effects (i.e. bleeding) therefore this should never be done. See NEWT for further guidance.	No suggestions for unlicensed dabigatran	Refer to 'DOAC Prescribing in Patients with Non-Valvular AF and for the treatment and prevention of VTE Frequently Asked Questions' via http://www.ggcmedicines.org.uk/blog/mue-07-doac-prescribing/
Dantrolene	No licensed solution	Open capsules and disperse contents in water or acidic fruit juice. See NEWT for further guidance.	Liquid special suspensions of varying strength to suit dose required.	25mg/5ml oral suspension x 200ml included in Part 7S of Scottish Drug Tariff. Note - restricted to specialist use only or specialist initiation (dependant on indication) in GGC Formulary.
Dekas Plus sf oral liquid				Dekas Plus sf oral liquid x 60 ml included in Part 7U of Scottish Drug Tariff
Dermacool®				Included in Part 7U of Scottish Drug Tariff - various strengths of cream available
Dexamethasone 0.1% Eye Drops Preservative Free	LICENSED Dropodex® and Minims® Dexamethasone 0.1% single-use eye drops available			7 days shelf life once opened - store in fridge

D

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Dexamethasone	LICENSED oral solution SF available: 2mg/5ml, 10mg/5ml, 20mg/5ml LICENSED soluble tablets available.	Tablets have been crushed and mixed with water for administration. They should be crushed with care to avoid inhalation of dust by the carer. See NEWT for further guidance re enteral tubes	Unlikely to need: licensed products available 500microgram/5ml unlicensed liquid available	
Dexamfetamine	LICENSED Dexamfetamine 5mg/ml oral SF solution SF available. See lisdexamfetamine entry for information on lisdexamfetamine if appropriate (please refer to SPC at EMC at medicines.org.uk for dexamfetamine and lisdexamfetamine equivalences).		Unlikely to need: licensed products available.	Note - restricted to specialist initiation in NHSGGC Formulary.
Diazepam	LICENSED preparations available (2mg/5ml liquid, 5mg, 10mg rectal tubes).		Unlikely to need: licensed products available	2.5mg/5ml and 10mg/5ml oral suspension included in Part 7S of Scottish Drug Tariff
Diazoxide	LICENSED 50 mg tablets available (Eudemine®)	Use unlicensed suspension	Unlicensed diazoxide suspension available.	Costs vary depending on strength & volume Proglycem is favoured by some paediatric patients approx £340 1 x 30ml Generic preparation approx £80 1 x30ml
Diclofenac	LICENSED suppositories and topical gel available. Do not crush / open enteric-coated or modified-release preparations.		50mg/5ml oral liquid special available	
Dilantin Infatabs				Included in Part 7U of Scottish Drug Tariff

D

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Diltiazem	No licensed solution	All tablets and capsules are labelled as modified-release, however the 60mg generic preparation is not slow-release and can be crushed. Patients on once or twice-daily modified-release preparations may need to be converted onto three-times daily doses of the generic preparation. See NEWT for further options/guidance for enteral tubes	Unlicensed suspensions of various strengths available.	
Diltiazem Hcl Cream/Gel/Ointment 2%	NHSGGC advises that licensed version of GTN ointment (Rectogesic®) available and should be considered prior to unlicensed special order for diltiazem			Diltiazem 2% cream usually more cost effective than ointment. Diltiazem 2% cream included in part 7S of the Scottish Drug tariff
Dipyridamole	LICENSED capsules, tablets and suspension available A dosage adjustment is required when switching from modified-release capsules to suspension - see NEWT for guidance. Consider switch to clopidogrel if appropriate.	Use licensed SF suspension. Modified-release capsule contents have been mixed with soft food, juice or water, but this is not recommended. Capsule contents should not be crushed. See NEWT guidelines for further clinical guidance.	Unlikely to need; licensed products available. Unlicensed specials in differing strengths available.	
Donepezil	Licensed orodispersible tablets 5mg and 10mg available. Licensed 1mg/ml oral solution SF available	Unlikely to be required. Non dispersible tablets can be crushed & mixed with water for administration. Note- has a strong bitter taste.		Please refer to www.ggcprescribing.org.uk for prescribing restrictions in NHSGGC.
Dosulepin		Note- tablets have been crushed and capsules opened, but this is NOT recommended as the tablets are very hard and many brands are coated, and the powder has a local anaesthetic action. See NEWT for clinical guidance.	25mg/5ml and 75mg/5ml liquid specials available	
Doxazosin		Most standard tablets readily disperse in de-ionised water, e.g. water for injection. Do not use tap water. Modified release tablets should not be crushed. See NEWT for further guidance.	Unlicensed liquid specials available.	
Doxycycline	LICENSED 100mg dispersible tablets available, and are scored for equal halving	Do not open capsules as contents are irritant.		

E

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
E45®				E45 Dry Scalp Shampoo, E45 Junior Foaming Bath Milk included in Part 7U of Scottish Drug Tariff Both products are non-formulary in NHSGGC
Emulsifying Wax Solution				3% solution included in Part 7S of Scottish Drug Tariff
Enalapril	No LICENSED oral solution. N.B. LICENSED ramipril and captopril liquids available if appropriate.	Tablets can be crushed and dispersed in water. Without crushing some brands will disperse in around five minutes. The crushed tablets may have a bitter after-taste.	Unlicensed Special liquids of various strengths available	LICENSED ramipril 2.5mg/5ml oral solution SF is available. LICENSED captopril 5mg/5ml oral solution SF & captopril 25mg/5ml oral solution SF available
Entacapone		For swallowing difficulties option to crush tablets and give in jam, honey or orange juice. It has a bitter taste. For use in nteral tubes - tablets can be dispersed in water in one to five minutes (red dust produced may stain). See NEWT for further guidance.		
Eosin 2% Solution				Included in Part 7S of Scottish Drug Tariff
Ephedrine hydrochloride 0.25% Nasal Drops	LICENSED 0.5% product available			
Epistatus® (midazolam) oromucosal solution and oromucosal solution pre-filled syringes	LICENSED Epistatus® (10mg/ml) Oromucosal pre-filled syringe available. Other Epistatus® preparations, pre-filled syringe and multi-dose bottle are unlicensed but included in part 7U of the Scottish Drug Tariff. Prescribers should not be prescribing/community pharmacist should not be supplying 10mg/ml pre-filled syringes (PFS) to deliver a dose less than 10mg as the syringes are not marked/graduated Buccal midazolam should be prescribed by brand name to ensure the correct product and strength is supplied. A change in product could have an adverse effect on patient safety as dosage, volume, administration and training will differ between products.			All unlicensed Epistatus® preparations are included in Part 7U. Please refer to www.ggcmedicines.org.uk for prescribing notes and restrictions.
Ergocalciferol	LICENSED ergocalciferol 300,000units/1ml solution for injection ampoules, and 1.25mg capsules, available. NOT NORMALLY INITIATED IN PRIMARY CARE	Consider using a LICENSED colecalciferol liquid preparation.	Use of unlicensed specials should not be required - see colecalciferol.	Colecalciferol is the preferred form of vitamin D for prescribing in NHSGGC - please refer to Appendix 1 (colecalciferol).
Ethinylestradiol	LICENSED 1mg tablets available		Unlikely to need	
Eucerin®				Eucerin Dry Skin Relief 5% Face Cream With Urea®, and Eucerin Dermo Capillaire Calming Urea Shampoo® included in Part 7U of Scottish Drug Tariff. Both products are non-formulary in NHSGGC

F

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Ferromate				Ferromate 210mg tablets included in Part 7U of Scottish Drug Tariff
Ferrous Sulfate	Consider switching to LICENSED Ironorm® (ferrous sulfate) drops, Fersamal® (ferrous fumarate) syrup, Sytron® (sodium ferrededate) elixir or Galfer® (ferrous fumarate) syrup		Unlikely to need special oral solution: licensed products available. Ferrous Sulfate 60mg/5ml unlicensed oral solution and suspension available.	
Flecainide		Tablets can be crushed and dispersed in de-ionised water (e.g. water for injection). Some sources do not recommend this. Do not use tap water. NB may have a local anaesthetic effect on tongue- use with care. See NEWT for further guidance.	Unlicensed Special liquid available	25mg/5ml x 300ml oral suspension included in Part 7S of Scottish Drug Tariff. Note - restricted to specialist initiation in NHSGGC Formulary.
Fludrocortisone Acetate		Crush tablets and disperse in water. Give immediately.	Unlicensed fludrocortisone acetate liquid available	
Fluoxetine	LICENSED capsules, tablets, dispersible tablets (Olena®) and oral solution available.	If licensed dispersible fluoxetine tablets are not suitable, consider the suitability of alternate day dosing with licensed liquid, rather than an unlicensed preparation. Alternate day dosing is possible due to the long half life of fluoxetine and its active metabolite. Capsules have been opened and contents dispersed in 120ml of water, see NEWT for further guidance.	Unlikely to need: licensed products available.	
Folic Acid	LICENSED 2.5mg/ml and 5mg/5ml liquid preparations available.	Crush tablets and disperse in water. Give immediately.	Unlikely to need: licensed products available	
Forceval®	LICENSED Forceval® capsules available.		Unlicensed Forceval® Soluble and Forceval Soluble Junior® tablets available	Forceval® Soluble and Forceval Soluble Junior® tablets included in Part 7U of Scottish Drug Tariff
Fosfomycin	LICENSED 3g sachets available	Dissolve contents of sachet in glass of water and take immediately after preparation. Fosfomycin granules are not included in current NEWT guidelines, so advice for use with enteral tubes not available		For prescribing information for this medicine, please refer to www.ggcprescribing.org.uk
Furosemide	LICENSED liquids available: 20mg/5ml, 40mg/5ml and 50mg/5ml (NB: Sugar-free, Some brands contain alcohol)		Unlikely to need: licensed products available. Unlicensed 5mg/5ml oral liquid available	

G

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Gabapentin	LICENSED oral solution 50mg/ml SF available	Open capsule and dissolve contents in water or fruit juice or sprinkle onto food (to mask bitter taste). Use immediately as drug is rapidly hydrolysed. See NEWT for guidance on use with enteral feeding tubes, as varies depending on type of tube.	Liquid unlicensed suspensions of various strengths available. Use licensed strength if possible.	Please note when used for epilepsy, gabapentin is restricted to specialist initiation only as per NHS GGC Adult Formulary.
Glliclazide		For non-MR tablets: Crush well and mix with water or orange juice.	Liquid unlicensed special oral suspensions available.	40mg/5ml and 80mg/5ml liquid unlicensed specials available
Glucoboost				Glucoboost 40% gel 75g (3 x 25g) included in Part 7U of Scottish Drug Tariff
Glucose in Glycerol Nasal Drops				Glycerdex nose drops are included in Part 3 of Scottish Drug Tariff
Glyceryl Trinitrate Ointment	NHSGGC advises that licensed version of GTN ointment (Rectogesic®) available and should be considered prior to unlicensed special order for GTN 0.2 % ointment or unlicensed diltiazem 0.2% cream/ointment.		Unlicensed products available	Glyceryl Trinitrate Ointment 0.2% included in Part 7S of Scottish Drug Tariff
Glycopyrronium bromide	LICENSED 1mg and 2mg tablets available. LICENSED 1mg/5ml oral solution & 400* micrograms/ml (equivalent to 320 micrograms/ml of glycopyrronium) oral solution available. Consider hyoscine patches if appropriate.	If swallowing difficulties, the tablets can be crushed and mixed with water. See NEWT for further options/ information, including differences in licensed indications when used in enteral tubes.	Unlicensed liquid specials available.	NHSGGC paediatrics preparation of choice is licensed Sialanar® 320mcg/ml oral solution*. Licensed tablets and 1mg/5ml oral solution also used in paediatrics where appropriate.
Griseofulvin	No licensed griseofulvin liquid available in the UK. Consider switch to fluconazole which is available as a licensed liquid, if appropriate.	Drug is very insoluble, therefore, tablets unsuitable for crushing. Consider alternative treatment, e.g. terbinafine.	Unlicensed 125mg/5ml and 175mg/5ml oral suspensions available.

Lasinoh				
Lansoprazole	LICENSED orodispersible tablets available (e.g. Zoton FasTabs®). The tablet rapidly disperses in the mouth. The orodispersible tablets can be dispersed in a small amount of water and then administered via a naso-gastric tube or oral syringe if required.	For patients with difficulty swallowing, the capsules may be opened and the granules mixed with a small amount of water, apple/tomato juice or sprinkled onto a small amount of soft food (e.g. yoghurt, apple puree) to aid administration. Alternatively, consider switching to licensed omeprazole preparations (see Omeprazole entry) Use of lansoprazole in children is unlicensed. For guidance on use see NHSGGC Proton Pump Inhibitor Guideline for Neonates and Children.	Use of unlicensed liquid formulations of lansoprazole should not be necessary.	Note - orodispersible tablets restricted to specialist initiation in the Adult GGC Formulary for patients with narrow bore feeding tubes. For guidance on alternatives in children see NHSGGC Proton Pump Inhibitor Guideline for Neonates and Children.
L-Arginine		No information on L-Arginine on NEWT guidelines. See NEWT guidelines for information on Arginine if appropriate.	Unlicensed L-Arginine 1.25g capsules, 100mg/1ml oral solution, 2g/5ml oral solution, 500mg tablets and 5g injection available	
Larvae				Supplied as unlicensed product via Community Pharmacy in NHSGGC. For further information, please refer to ggcprescribing.org.uk/other-formularies/non-medicines-formularies , for Unlicensed medicines protocol: Prescribing larvae (August 2020).
Levomepromazine	Licensed 6mg, 25mg & 50mg tablets and 25mg/ml solution for injection ampoules available.	Crush tablets and disperse in water. Tablets disperse immediately.	Unlicensed liquid specials of various strengths available.	For further information please refer to the Scottish Palliative Care Guidelines at www.palliativecareguidelines.scot.nhs.uk
Levothyroxine	LICENSED liquid formulations of various strengths available. Monitor thyroid function.	Crush tablets and mix with water.	Unlikely to need unlicensed oral solution: licensed products available.	NHSGGC Paediatrics note - vast majority of paediatric patients will be prescribed levothyroxine tablets rather than liquid form, crushing the tablets if necessary.
Lidocaine gel	LICENSED 5% ointment available. Licensed 2% cream available (Vagisil). Consider switch to EMLA cream (lidocaine 2.5% & prilocaine 2.5%) or Instillagel (lidocaine 20mg/ml & chlorhexidine 500mcg/ml).		Unlicensed preparations available	Note - Please refer to NHS GGC Formulary at ggcmedicines.org.uk for prescribing notes/restrictions.
Lift Glucose Juice Shot				Included in Part 7U of Scottish Drug Tariff.
Lift Glucose Tablets				Included in Part 7U of Scottish Drug Tariff - Blueberry Burst, Juicy Raspberry, Tangy Orange, Zesty Lemon and Lime
Lisdexamfetamine dimesylate	Available as LICENSED 20mg, 30mg, 40mg, 50mg, 60mg and 70mg capsules (Elvanse®). Please note LICENSED Dexamfetamine 1mg/ml oral solution available (refer to SPC on EMC at medicines.org.uk for lisdexamfetamine and dexamfetamine equivalences).	No information available on NEWT. Elvanse capsule may be swallowed whole, or the capsule opened and the entire contents emptied and mixed with a soft food such as yoghurt or in a glass of water or orange juice and take immediately (SPC, Electronic Medicines Compendium).		Please refer to ggcprescribing.org.uk for prescribing restrictions in NHSGGC.
Lisinopril	LICENSED lisinopril 5mg/5ml oral solution (sugar-free) available	Tablets can be dispersed in water	UNLICENSED liquids available in various strengths	
Lofepamine	LICENSED 70mg/5ml suspension SF available.	Tablets are NOT suitable for crushing.

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Octenisan				Octenisan antimicrobial wash mitt included in Part 7U of Scottish Drug Tariff
Odaban				Odaban 20% included in Part 7U of Scottish Drug Tariff
Oilatum				Oilatum Bath Formula and Oilatum Scalp Intensive Shampoo included in Part 7U of Scottish Drug Tariff
Olanzapine	LICENSED orodispersible tablets available. Can be placed on the tongue or dispersed in water, orange juice, apple juice, milk or coffee. Olanzapine may be irritant to the skin and eyes, so take precautions to avoid contact (e.g. wear gloves).		Unlicensed Special oral liquid available	Note - restricted to specialist initiation in GGC Formulary.
Omeprazole	LICENSED oral suspensions are available in 10mg/5ml (2mg/ml) and 20mg/5ml (4mg/ml) strengths. Use of these products in neonates and children is not supported by paediatric specialists in NHSGGC. LICENSED orodispersible tablets available (e.g. Losec MUPS®). The orodispersible tablets can be dispersed in a small amount of water and then mixed with fruit juice or apple puree to aid administration.	For patients with difficulty swallowing, the capsules may be opened and the granules mixed with a small amount of water, fruit juice or sprinkled onto a small amount of soft food (e.g. apple puree) to aid administration. Alternatively, consider switching to licensed lansoprazole preparations (see Lansoprazole entry).	Unlicensed omeprazole oral suspensions of various strengths are available but are not recommended for use in NHSGGC. Unlicensed omeprazole oral solution may be appropriate for some paediatric patients. For guidance see NHSGGC Proton Pump Inhibitor Guideline for Neonates and Paediatrics.	Note - orodispersible tablets are restricted in the Adult GGC Formulary for patients with narrow bore feeding tubes. Aclomep 20mg/5ml (4mg/ml) powder for oral solution is available from Alcardian, and may be appropriate for some paediatric patients. For guidance see NHSGGC Proton Pump Inhibitor Guideline for Neonates and Paediatrics.
OroNac				OroNac 600 Caps and OroNac 600 Tabs included in Part 7U of Scottish Drug Tariff
Oxybutynin	LICENSED sugar-free liquids available - please ask prescriber to select 'sugar-free' product to ensure licensed product supplied. LICENSED patches available if appropriate	For non-MR tablets: Crush and mix with water. Do NOT crush MR tablets		Note - MR and patches restricted to specialist initiation in GGC Formulary

P

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Papaverine Injection			Various strengths available	
Paravit				Paravit-cf capsules and Paravit-cf SF liquid included in Part 7U of Scottish Drug Tariff
Penicillamine		Crush tablets and mix with water. Give immediately.	250mg/5ml Unlicensed liquid special available	Note - restricted to specialist initiation in NHSGGC Formulary.
Perindopril	Consider switching to alternative ACEI.	There are two salts of perindopril available - erbumine and arginine, and the doses are NOT equivalent. No information is available for perindopril arginine in enteral feeding or swallowing difficulties. For perindopril erbumine in swallowing difficulties, the tablets can be crushed and mixed with water. See NEWT guidelines for more information.	Unlicensed liquid special products available	See NEWT guidelines for more information.
Phenobarbital (Phenobarbitone)	Consider LICENSED 15mg/5ml elixir (NB Contains 38% alcohol). Not suitable in children - see comments.	Crush tablets and mix with water.	50mg/5ml special oral solution available	50mg/5ml oral suspension included in Part 7S of the Scottish Drug Tariff. GGC Formulary Note - restricted to specialist initiation. Patients should be maintained on a specific manufacturer's preparation. Prescriptions should detail the manufacturer of the generic preparation. GGC paediatrics note - Elixir not suitable for children - usually use UNLICENSED alcohol free 50mg/5ml (Rosemont). In the treatment of epilepsy, recommended to maintain on a specific manufacturer's product. Care is needed when switching between different preparations.
Phenytoin	LICENSED preparations available (liquid and chewable tablets). Care is needed when switching between different phenytoin preparations. Dose conversion required when changing from tablets/capsules to suspension.	Administration of suspension via enteral feeding tubes is not recommended. For feeding tubes then parental injection is first choice. See comments.	90mg/5ml unlicensed special oral suspension available	Note - restricted to specialist initiation in NHSGGC Formulary. In the treatment of Epilepsy, recommended to maintain on a specific manufacturer's product. Care is needed when switching between different brands and formulations. Phenytoin administration via enteral feeding tubes not recommended due to unpredictable absorption and interaction with enteral feeds, that affects bioavailability. Only use if no alternative. Patient response and levels need careful monitoring, especially after feeding regimen changes. Not for jejunum administration.

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Tranexamic acid	No licensed solution or mouthwash	Crush tablets and mix with water.	Liquid unlicensed special suspensions of varying strengths and 5% mouthwash	500mg/5ml oral solution included in Part 7S of Scottish Drug Tariff
Trazodone	LICENSED liquid available but very EXPENSIVE. Consider licensed tablets or capsules (see comments)	Do not crush tablets. Open capsules and add contents to small volume of water or soft food stuffs and administer immediately (unpleasant taste) Feeding/NG tube: open 50mg capsule and mx contents in 15ml of water until no visible particles are seen; flushes via an 8Fr NG tube without blockage See NEWT for further guidance		Refer to NHSGGC Trazodone, appropriate formulation choice and user guide -Dec 2020 https://ggcmedicines.org.uk/blog/medicines-update/mental-health-guideline-updates/
Trientine Dihydrochloride	LICENSED tablets/capsules available	Not listed in NEWT guidelines		
Trihexyphenidyl HCL	LICENSED liquid formulation 5mg/5ml oral syrup available	Tablets will disperse in water for administration in swallowing difficulties See NEWT for further guidance	Unlikely to need: licensed products available. 2mg/5ml and 1mg/5ml oral unlicensed suspension special available.	

U, V, W & Z

SCOTTISH DRUG TARIFF PART 7S JUNE 2021

SCOTTISH DRUG TARIFF PART 7U JUNE 2021

Drug	Option 1: Use a licensed medicine in a suitable licensed formulation (incl review ongoing need or change to different drug in same therapeutic class)	Option 2: Use a licensed medicine in an unlicensed manner (e.g. crushing tablets)	Option 3: Only if clinical reason exists for not using licensed product: Use an unlicensed special	Comments
Urea Oint 25%	Consider Flexitol / Dermatronics heel balm (Urea 25% balm)			
Ursodeoxycholic Acid	LICENSED 250mg/5ml suspension SF available	Can crush tablets and mix with water but limited solubility. Do not open capsules.	Unlikely to need; licensed products available	Note - restricted to specialist initiation in NHSGGC Formulary.
Valproic Acid (Depakote)	Valproic acid and sodium valproate are not directly interchangeable. However, could consider review and change to LICENSED Epilim liquid 200mg/5ml with care. NB: there are pharmacokinetic differences; take care when switching. See NEWT guidelines for more information. Further Specialist Pharmacy Service (SPS) guidance on switching between formulations is available.	Not recommended to crush Depakote tablets	Liquid unlicensed special available - Valproic acid suspension 500mg/5ml	Note - restricted to specialist initiation in NHSGGC Formulary. In the treatment of epilepsy, recommended to maintain on a specific manufacturer's product. Care is needed when switching between different preparations. Changing from valproic acid tablets to sodium valproate liquid in swallowing difficulties is the preferred option to consider in NHSGGC. NEWT states 'there is no officially recommended dose conversion between the two products, due to their differing pharmacokinetics. However it would seem sensible to convert patients on Depakote to the same dose of sodium valproate liquid and monitor the clinical effect'. Further Specialist Pharmacy Service (SPS) guidance on switching between formulations is available
Vancomycin	Licensed capsules available	The injection can be diluted with 30mL water for injection and given enterally. The expiry of the reconstituted injection depends upon the brand. Do not administer vancomycin capsules via enteral tubes/swallowing difficulties.	Liquid unlicensed special available	NEWT guidelines advice (May 2020): 1st Choice -unlicensed solution 2nd Choice - injection given orally or via enteral tube
Venlafaxine	No licensed liquid available	For non MR tablets: crush and mix with water or jam. MR capsules: Open capsule and mix with smooth food e.g. yoghurt. NB: DO NOT crush contents	Liquid unlicensed special suspensions of varying strength to suit dose required	75mg/5ml and 37.5mg/5ml oral suspension included in Part 7S of Scottish Drug Tariff.

Notes –

Non- preferred/restricted formulations shaded in table. Most cost effective formulations in bold in table

15,000 units/5ml liquid formulations are expensive – preferably do not use.

20,000 unit solid formulation – Now on SDT Part 7 so prescribe generically as per Scottish Government policy.

25,000 unit solid formulation –Thorens 25,000 unit caps are most cost effective

50,000 unit solid formulation - Invita D3 50,000 unit caps are cost effective

The MHRA recommends that an unlicensed medicine should only be used when a patient has special requirements that cannot be met by use of a licensed medicine. Please note that any change or advice based on this information should be based on a medication review to ensure clinical appropriateness of therapy.
